LC OS HardwaxOil NEXT

Hardwaxoil

Very fast drying due to
the new combination of
ingredients

Outstanding surfaces with natural appearance

Our newly developed LC OS HardwaxOil NEXT combines the advantages of modified natural oils and waxes. This special formula impresses by its excellent resistance to chemicals, very short drying times and strongly reduced yellowing. The surface finished with LC OS HardwaxOil NEXT supports the natural appearance of your floor and gives the wood a special walking comfort due to its soft feel.

LOBA – Your partner for surface finishing and care

LC OS HardwaxOil NEXT

- Very fast drying
- Reduces oil-specific yellowing
- Safe and simple application in two layers
- High resistance to residential requirements
- Excellent machine handling
- Endless number of color combinations
- Soft touch effect

Surfaces:

HardwaxOil matte

The HardwaxOil matte surface, newly developed by LOBA, offers an extremely matte look with a pleasantly soft feel and excellent resistance. These advantages make LC OS HardwaxOil a universal partner for a wide range of applications.

LC OS HardwaxOil NEXT

HardwaxOil Invisible, raw wood effect

A raw wooden surface radiates natural grace. The trendy HardwaxOil Invisible surface preserves the beauty of untreated wood through an invisible protective coat. Thanks to the newly developed LC WS Brightener, the wood surface looks oiled but not amberized, creating a natural raw wood effect.

HardwaxOil Protect

HardwaxOil Protect is the answer to the current market trend: it combines the natural look of an oiled surface with the excellent protection of a waterbased finish. LC OS HardwaxOil NEXT extra-matte intensifies the wood and can also be combined with a coloring. If desired, the resistance can be increased by applying a second protective coat manually after installation.
